

## PARENTAL CIRCULAR

### MR Vaccination for Age Group 9 Months to 15 Years

Dear parents,

The government of India in association with State Govt is conducting MR (Measles Rubella) campaign as a part of the national strategy to eradicate Measles and control Rubella. Department of health and Education is partnering with the schools to jointly participate in the MR campaign. It is to be launched in January 2019. All the children between age groups of 9 months to 15 years in Private & Govt. Schools in Gaya will be immunized. The MR campaign is being conducted to increase the immunity level of the entire community. The booster dose of vaccine is absolutely safe (WHO approved) with no side effects. We hope you will understand the significance of this vaccination and give your kind consent for the same. Your positive decision will definitely favour your child's immunity. The vaccination is absolutely free and will be injected by a trained team of doctors from District Hospital in our school premises.

This campaign already completed in 28 states of India immunizing more than 12 crore children without any serious adverse effects.
